CONSTRUCTIVE TYPOLOGY AND SOCIAL THEORY

JOHN C. McKINNEY

CONSTRUCTIVE TYPOLOGY AND SOCIAL THEORY

Contents

FOREWORD BY PAUL F. LAZARSFELD, COLUMBIA UNIVERSITY

INTRODUCTION

CONCEPTS, CONSTRUCTS, AND CONSTRUCTED TYPES

THE POLAR VARIABLES OF TYPE CONSTRUCTION

TYPES IN RELATION TO THE METHODOLOGY OF THE SOCIAL SCIENCES

CONSTRUCTIVE TYPOLOGY WITHIN THE CONTEXT OF MODERN SOCIOLOGY

THE SOCIETAL CONTINUUM: POLAR TYPES

TYPES, SOCIAL SYSTEMS, AND THE PROBLEM OF INSTIGATED SOCIAL CHANGE

TYPES, CONTINUITY, AND THE PROCESS OF PLANNING FOR CHANGE

TOWARD A CODIFICATION OF TYPOLOGICAL PROCEDURE

SELECTED BIBLIOGRAPHY

THE MOST COMPREHENSIVE TREATMENT OF ITS KIND, this new work explores the role of the process of typification in social theory and research. The construction of types and typologies is intensively examined to determine their structure and function in social inquiry and to explicate a procedure for their formulation.

Constructive typology is viewed as an aspect of scientific methodology generally, but is seen as having its own logic and normative rules of procedure. Within this frame of reference the constructed type is defined as a purposive, planned selection, an abstraction combination and, sometimes, an accentuation of a set of criteria with empirical referents that serves as a basis for comparison of empirical cases.

The book, designed primarily for graduate students and the professional in sociology, provides a valuable source of information in an area in which the literature, while extensive, is highly fragmentary and scattered.
